

Probimin Tablet

What are lactic acid bacteria?

"Lactic acid bacteria are bacteria that produce lactic acid as they ferment. The bacteria are virtually everywhere: in plants, in the air we breathe and in our own skin and our intestinal tract. Lactic acid bacteria are found in countless variations and strengths."

Probimin is a Swedish supplement with lactic acid bacteria that are patented for its unique tablet form.

The smart tablet

The unique patented Probimin tablet is designed so that the bacteria will end up in the right place. The tablet has a slower digestion in comparison to other products. Size-wise, the tablet is very small and easy to swallow. For those who have trouble swallowing pills, there are also Probimin in powder form.

Swedish research and only natural content

Probimin contains only natural ingredients. This means that everyone can enjoy our products. Our bacterial cultures are well documented by Swedish researchers and clinically developed according to pharmaceutical standards and are quality assured by independent laboratories.

Does your horse or dog problems with their joints?

Chondroflex could be an option. Chondroflex is a dietary supplement that contains only natural products.

Dosage horse (crush the tablets and put in the food)

6 tablets per day for four weeks, then 4 tablets per day as maintenance dose.

Dosage Dog (crush the tablet and place in the food)

(VEGEBOM – Häst)

A good horse ointment with many uses.

A light antiseptic and emollient ointment for both muscles and bones?

The ointment that naturally contribute to your horse's well being.

Vegebom Veterinaire, which is easily antiseptic and emollient, has been on the market in France for many years where it has been used for a variety of horse-related problems. The ointment has also been in the Swedish market for some years now and the customers, who are constantly growing in number, are very happy with the good effects of the ointment. The ointment works very well for Icelandic horses receiving various types of skin problems in summer which are often provoked by midges. These bites often cause severe itching of wounds as a result. With Vegebom Veterinaire you can alleviate the horse's problems. Vegebom Veterinaire is a carefully proven ointment consisting of natural plant extract mixed in an oil-based gel. Only ingredients that satisfy the European "pharmaceutical codex" is used. The ointment is produced under pharmaceutical septic inspection and "Good manufacturing practice". It can be used with other products as a complementary treatment. No antibiotics or sulfamides are included.

Use:

- For "summer skin"-problems, dry skin, to soften.
- On strained bones and tendons
- For muscle soreness
- Is insect repellent
- At engorgement, not dangerous for the mare foal suckling.

Instructions

- Wash the area to be treated with hot water, wipe, lubricate with the ointment. At engorgement or swelling, rub the ointment on the area and allow a stock to remain on the surface. Cover if necessary so the horse does not lick the ointment. If necessary, repeat every four hours.

Note

- Vegebom Veterinaire contains selected plant extracts that can trigger allergic reactions to some people. If you discover irritation or a rash on your hands, wash with warm water and refrain from further use without gloves.

Sustainability

- The cream can be stored for 5 years under normal conditions, and the expiration date is found on the tube. If it hardens due to cold weather warm it in lukewarm water until it regains the desired consistency.

Cooling Bandage Flexible Ice

Cooling bandages, size 37x 42 cm

Bandage with 2 Flexible Ice, 37 x 21 cm.

This product now provides the possibility to actively treat animals and humans in an optimal way. The long-lasting cold reduces muscle tension and penetrate deep into the tissues, thus inhibiting the inflammatory process.

Flexible Ice is totally flexible in all directions and provides an effective and long cooling time. The content is completely non-toxic.

Flexible ice laid in a protective "case", in which it is attached with elastic straps with Velcro. This helps you to attach the bandage where you want it, and it sits remain in place! This case can be washed at 40 ° C. Cooling bandage stored in a freezer when not in use (3-4 hours freezing time). Cooling bandage is easy to use for various injuries through its special design.

About Us

Top Speed Hälsa & Försäljnings AB was founded in 1992. We strive to provide health market with different types of products for both humans and our animals.

Our products contain only natural ingredients.

Our basic values are:

- Only natural products
